SUMMARY

Software Engineer skilled in React, TypeScript, Django REST Framework, and cloud/containerized deployments via Docker. Demonstrates strong computer science fundamentals and hands-on experience delivering end-to-end SaaS platforms and RESTful web applications. d Tailwind CSS, with working knowledge of REST API integration.

EDUCATION

Babu Banarasi Das Institute of Technology and Management (AKTU)

B.Tech in Computer Science Engineering (Data Science) CGPA: 7.54/10

Lucknow, Uttar Pradesh

Nov 2022 – May 2026

EXPERIENCE

Software Engineer Intern

XRG Consulting Private Limited

Hyderabad, Telangana

Sep 2025 – Nov 2025

- Built responsive UI modules for Anvayaa KinCare, a caregiver management platform, using React.js and Tailwind CSS, translating designs into reusable components.
- Integrated REST APIs with Django to fetch and manage caregiver scheduling, activity tracking, and dashboard data.
- Implemented search, filtering, pagination, and form validation across care management modules to improve usability.
- Debugged frontend issues and performed manual testing to ensure UI consistency and application quality.
- Collaborated with senior developers and QA engineers in an Agile environment, participating in sprint planning and code reviews.

PROJECTS

VYBE | [Github](#) | [Live](#) | *React 18, TypeScript, Node.js, Express.js, Socket.IO, MongoDB, Clerk, Cloudinary*

- Engineered a real-time social music platform with Socket.IO delivering sub-100ms playback sync, synced LRC lyrics highlighting, and 1-on-1 track sharing.
- Integrated Jamendo and Spotify APIs for unified audio catalog search, using an in-memory 5-minute cache to eliminate rate limits.
- Implemented Clerk authentication with guest playback gating, admin RBAC controls, and automated media assets storage pipelines via Cloudinary.

Cortex | [Github](#) | [Live](#) | *React 18, Node.js, Express.js, MongoDB, OpenRouter (GPT-4o-Mini), Web Speech API, Razorpay*

- Built an AI mock interview SaaS using pdfjs-dist and OpenRouter (GPT-4o-Mini) to parse resumes and generate adaptive technical questions.
- Developed a hands-free voice interview pipeline using Web Speech STT/TTS synchronized with video avatars and multidimensional real-time feedback scoring.
- Architected a credit-based monetization engine with Razorpay, securing webhook transactions using server-side HMAC SHA-256 validation in MongoDB.

TaskFlow | [Github](#) | [Live](#) | *React 19, TypeScript, Python, Django, Django REST Framework, PostgreSQL, Docker*

- Developed a project management SPA using React 19 and DRF, featuring multi-tenant workspace isolation and interactive 3-stage Kanban boards.
- Enforced server-side RBAC with custom DRF permission classes and stateless JWT (HS256) authentication across workspace invitation and management flows.
- Built an analytics dashboard using Recharts for overdue triage, deploying the decoupled system via Docker, Nginx, and Unicorn architecture.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS

Frontend: React.js (18/19), Next.js, Vite, Tailwind CSS, GSAP, Framer Motion, Axios, Zustand

Backend: Node.js, Express.js, Django, Django REST Framework, RESTful APIs, WebSockets, Socket.IO

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS (EC2), Docker, Nginx, Linux/Bash, Git, GitHub

ACHIEVEMENTS

- Solved **340+** **Data Structures & Algorithms** problems on [LeetCode](#)
- **Purple Tech Hackathon 2026:** Advanced to Round 2 after clearing the initial DSA evaluation stage among **3,000+** participating teams.
